# Native Plant Nursery

The Otsego Conservation District is dedicated to offering a local source of native plant materials to the residents of Northern Michigan.

Native plants help to restore lakeshores and stream banks, improve water quality, attract pollinators, and provide wildlife habitat.

**For all you need to know about native plants access the Otsego Conservation District website:**

- General information about the benefits of native plants.
- Specifics on each of our species including bloom period, sun/shade requirements, and wetland indicator status.
- Different types of gardens you can create, such as butterfly, pollinator, riparian, rain, shade, and sun gardens!

[www.otsegocd.org](http://www.otsegocd.org)

## Types of Native Gardens

To ensure the health of your garden, we have grouped native wildflowers and grasses into the following gardens based on shared characteristics:

**Butterfly Garden:** The native plants in this garden encourage butterflies by providing food and/or shelter during all phases of the butterfly life cycle.

**Pollinator Garden:** The native plants in this garden attract pollinators, such as bees and butterflies, as well as natural enemies to garden pests. This list was compiled from research conducted at Michigan State University.

**Riparian Gardens (Shade and Sun):** Some of these native plants need moist to wet soil and do well in or right next to water. Others prefer moist to dry soil and would be planted higher on the bank. A few, such as the Black-Eyed Susan, have extensive root systems which prevent erosion.

**Shade Garden:** Some of these native plants do well in full shade, others in partial sun. Most prefer moist soil.

**Sun Garden:** These native plants do well in full sun.

## Planting a Native Garden —Considerations

- **Sun vs. Shade** How much sun will your garden get?
- **Wet vs. Dry** Are you planting in a wetland or a dry area?
- **Riparian Gardens** Are you planting a buffer strip on a lakeshore or stream bank?
- **Attracting Insects** Do you want to attract butterflies, pollinators, or natural enemies of garden pests?
- **Aesthetics** When will your flowers bloom and what colors will they be?

## 2021 Species List

Big Bluestem (*Andropogon gerardii*)  
 Big-Leaved Aster (*Aster macrophyllus*)  
 Black-Eyed Susan (*Rudbeckia hirta*)  
 Blue Lobelia (*Lobelia siphilitica*)  
 Bluestem Goldenrod (*Solidago caesia*)  
 Blue Vervain (*Verbena hastata*)  
 Boneset (*Eupatorium perfoliatum*)  
 Butterfly-Weed (*Asclepias tuberosa*)  
 Canadian Wild Rye (*Elymus canadensis*)  
 Cardinal Flower (*Lobelia cardinalis*)  
 Culver's Root (*Veronicastrum virginicum*)  
 Cup Plant (*Silphium perfoliatum*)  
 False Sunflower (*Heliphs helianthoides*)  
 Foxglove Beard-tongue (*Penstemon digitalis*)  
 Golden Alexander (*Zizia aurea*)\*  
 Hairy Beardtongue (*Penstemon hirsutus*)  
 Hoary Vervain (*Verbena stricta*)  
 Joe-Pye Weed (*Eurochium maculatum*)  
 Missouri Ironweed (*Vernonia missurica*)  
 Monkey Flower (*Mimulus ringens*)  
 New England Aster (*Aster novae-angliae*)  
 Nodding Wild Onion (*Allium cernuum*)  
 Obeident Plant (*Physostegia virginiana*)  
 Purple Coneflower (*Echinacea pupurea*)  
 Riddell's Goldenrod (*Oligoneuron riddellii*)  
 Sand Coreopsis (*Coreopsis lanceolata*)  
 Showy Goldenrod (*Solidago speciosa*)  
 Smooth Blue Aster (*Aster laevis*)  
 Swamp Milkweed (*Asclepias incarnate*)  
 Tall Bell Flower (*Campamula Americana*)  
 Tall Coreopsis (*Coreopsis tripteris*)  
 Wild Bergamot (*Monarda fistulosa*)  
 Wild Blue Flag Iris (*Iris versicolor*)  
 Yellow Coneflower (*Ratibida pinnata*)
