

Invasive Species Identification and Removal Workshop

Autumn Olive

Japanese Barberry

**Thursday, October
7th 4pm - 6pm
459 Livingston Blvd., Gaylord MI
49735**

Come join Huron Heartland Invasive Species Coordinator, Shelby Bauer and Otsego Conservation District Forester, Joellen Saugrich to learn more about identifying common invasive plants. At this 2-hour event you will learn how to identify common invasive plant species in a classroom setting and then we will take you outside to practice hands-on techniques for safe and effective removal. Please dress appropriately as we will be walking through woods to identify and remove species including autumn olive, Japanese barberry and honeysuckle.
