

ABOUT THIS GUIDE

The purpose of the Otsego County Recycling Guide is to provide resources and information to the residents of Otsego County to help manage solid waste through reduction, reuse and recycling. It is made possible through the County of Otsego and the Otsego Conservation District.

For more information about recycling and household hazardous waste disposal please visit www.OtsegoRecycling.org, contact the Otsego Conservation District office at (989) 732-4021 or visit their website: www.otsegocd.org.

The Three R's: Reduce, Reuse and Recycle

Reduce: Produce less waste for example, by shopping for items with less packaging, using reusable containers and using dish clothes instead of paper towels.

Reuse: Finding new and creative ways to reuse products is economically and environmentally beneficial. Examples of reuse include donating used items to charities and saving plastic grocery bags to use as small trash bags.

Recycle: The recycling process collects and sorts used materials to be remanufactured into new products, reducing the need for virgin materials. It also prevents materials from being placed in landfills.

Fast Facts

- 89 billion plastic bags are used each year in the U.S.
- Recycling just 500 phone books could save 7000 gallons of water
- About 34% of waste could be composted
- Recycling 1 can saves enough energy to run a TV for 2 hours

Source: Earth911

Otsego County's Recycling Drop-off Program

Dual-stream recycling means 2 handy bins:

1. Mixed Containers

Cardboard juice boxes, paper milk cartons and paper cups

- Please rinse and flatten
- *NO juice pouches or straws*

Plastic bottles, jugs, jars, tubs, trays and cups

- All numbers accepted
- Please rinse and flatten (no need to remove labels)
- *NO Styrofoam, motor oil jugs, toys, oversized containers or durable dishes*
- *NO plastic bags. (See Paper, Boxes and Bags Bin on facing page)*

Metal cans, foils and trays

- Aluminum, steel and tin. Metal lids are okay.
- Please rinse and flatten
- NO aerosol cans or propane tanks (See pages 6 & 30)

Glass bottles and jars

- Clear and all colors
- Please rinse. No need to remove labels.
- *NO light bulbs, window glass or glass dishes*

Recycling Bin Drop-off Locations

1. **Otsego Recycling West:** 71 Hayes Tower Road, Gaylord, 550 feet south of the M-32 and Hayes Tower Road intersection, just south of Hayes Township Hall
2. **Otsego Recycling North:** 621 Garfield Street in Vanderbilt, Northeast of the Vanderbilt Village Hall and the intersection of Garfield and Elm Street
3. **Otsego Recycling Central:** 931 S. Otsego Avenue in Gaylord, near Jay's Sporting Goods
4. **Otsego Recycling South:** 247 Old State Road across from the Otsego Lake Township Cemetery, half-mile east of the intersection of Old 27 South and Old State Road
5. **Otsego Recycling East:** 2932 Rock Road, Johannesburg, at the Charlton-Chester-Dover Transfer Station near the corner of M-32 East and Rock Road

Items are accepted 24/7.

For a map showing bin locations, see inside back cover of this guide.

2. Paper, Boxes and Bags

Cardboard and paper bags

- Boxes from frozen and refrigerated foods are okay
- Boxboard/fiberboard like cereal boxes and paper towel cores
- Please remove packaging materials and flatten
- Bubblewrap and air pillow packaging materials are okay
- *NO Styrofoam or pet food bags*

Newspapers, inserts, magazines, catalogs and books

- *NO newspapers that are wet and/or yellowed*
- Hardcover, paperback and phone books are accepted

Office paper

- Junk mail, envelopes, copy paper, writing paper and file folders (no need to remove rubber bands, paper clips, plastic windows from envelopes, mailing labels, sticky notes, stickers, staples or tape)
- Shredded paper (Place in a transparent bag and tie shut.)
- *NO construction paper, dark/bright copy paper, or padded envelopes*

Plastic grocery and bread bags

- Stretchy, clean and dry bags only
- Shrink wrap from around rolls of paper towel and cases of water are okay
- *NO cling wrap, cereal box liners, or “crunchy” plastics like cellophane, pretzel bags, potato chip bags, etc.*
- *NO loose plastic bags.* (Stuff all plastic bags into one bag and tie shut.)

For a full brochure, check out the display board at each drop-off site.

**Still not sure if
it's recyclable?**

made possible through
the recycling millage.

Saturday, June 8, 2019

9 a.m. to 2 p.m.

Otsego County Road Commission

669 W. McCoy Rd., Gaylord

Household Hazardous Waste Collection for Businesses

We want to make it simple for you to dispose of hazardous waste properly! Our HHW program can take hazardous materials from businesses and organizations which meet both of the following criteria: Produce less than 220 pounds of hazardous waste a month and never accumulate more than 2,200 pounds of material at a time. Call (989) 732-4021 for more information.

What can't I bring?

- Weapons, explosives, ammunition, radioactive materials
- Debris, asphalt, shingles, building supplies and trash since it is not considered household hazardous waste
- Modern Latex Paint. Latex paints only qualify as hazardous waste and must be disposed at HHWD if they:
 - Were manufactured before 1980 - May contain lead
 - Are labeled "mildew resistant" - Contain pesticides
 - Are labeled "wood preservative" - Contain pesticides

Disposing of Latex Paints

Latex paint is less toxic than oil-based paint, but it still contains chemicals. When not disposed of properly it can seep into groundwater and bodies of water. While it's okay to rinse brushes and rollers and clean your hands at a sink after painting with latex, do not pour paint down the drain. Instead, try these options:

- Take to the Emmet County Drop-off Center. Call (231) 348-0640 or visit www.emmetcounty.org/latex-paint-is-recyclable-529/ for more information.
- Dry it up: Use kitty litter, shredded paper or sawdust to absorb the remaining paint; after it dries dispose of the can in the garbage.
- Donate it: Ask friends and neighbors if they need paint for a small project. Local schools or theater groups sometimes look for free paint for art projects and sets.
- Store it: Save leftover paint for future touch-ups. To prevent paint from drying out, wrap the can's lid with plastic wrap, making sure the lid fits securely and doesn't leak.

Helpful Hints:

- Many items can be recycled for free in Otsego County. Refer to this booklet.
- Please do not mix liquids. Keep them in their original containers if possible.
- When you arrive at the drop-off, please stay in your vehicle. Our contractors will unload your materials from your vehicle.

Note: Please remove seats, faucets, etc. from plumbing fixtures. NO lead paint or asbestos.

Wood: No treated wood, plywood, particle board. No flashing. No cedar shakes, roll roofing, roofing tiles or drip edge. No drywall.

Items accepted seasonally from April 1 to November 1.

Natural Home Remedies: Less Toxic Alternatives to Common Household Cleaners

Many brand-name cleaners used in households today contain toxic or hazardous chemicals. There are less toxic alternatives that can be used. These solutions are typically more cost-effective.

PURPOSE	LESS TOXIC ALTERNATIVE
All-purpose cleaner	Mix 1/2 cup vinegar + 1/4 cup baking soda (or 2 teaspoons borax) into 1/2 gallon of water
Bathroom mold	Mix one part hydrogen peroxide with 2 parts water in spray bottle; wait 1 hour before rinsing
Bleach	Borax
Car battery corrosion	Baking soda and water
Carpet stains	Club soda
Coffee and tea stains	Moist salt; for coffee makers add 2 cups water and 1/4 cup vinegar and bring to a boil, rinse with water and wipe clean
Dishwasher soap	Mix equal parts of borax and washing soda
Disinfectant	Mix 2 teaspoons borax, 4 tablespoons vinegar and 3 cups hot water
Drain cleaner	1/2 cup baking soda down drain and add 1/2 cup vinegar wait 15 minutes and flush with warm water
Fertilizer	Compost and vermicomposting
Furniture polish	1 tablespoon lemon oil in 1 pint mineral oil
Garbage disposal	Ground lemon
Grease removal	Borax on damp cloth
Ink spot remover	Cold water and 1 tablespoon cream of tartar and 1 tablespoon lemon
Laundry detergent	Mix 1 cup Ivory soap, 1/2 cup washing soda and 1/2 cup borax. Use 1 Tbsp. for light loads; 2 Tbsp. for heavy loads.
Oil and grease spots	For small spills on the garage floor, add baking soda and scrub with wet brush
Oven cleaner	2 tablespoons liquid soap and 2 tablespoons borax and warm water
Per odor remover	Cider vinegar
Rust removal	Lemon juice, salt and sunlight
Window cleaner	Mix 2 teaspoons of white vinegar with 1 liter warm water

Please visit this website for more tips and alternatives:

Items: Glass - No window glass or light bulbs please.

Note: Call or check website for fees and item preparation guidelines.

Fertilize Smart

You probably know that fertilizer allows for a lush green lawn but you may be unaware of how it impacts local watersheds. One of the most problematic water pollutants in Michigan is phosphorus. Phosphorus is a nutrient found in most lawn and garden fertilizers.

What is the issue with phosphorus?

Phosphorus occurs naturally. It becomes a pollutant when human sources add an excess amount to the environment. When fertilizers run off lawns during a rain, the phosphorus is added to surrounding lakes and streams. Excess nutrients in lakes can cause algal blooms which are harmful to aquatic life and humans. Algal blooms are unsightly, often have an unattractive odor, cause fish kills, disruption of lake ecosystem dynamics, and can be harmful to humans. Groundwater pollution is also a concern with fertilizers.

Healthy Lawn Tips

You can still have a green lawn without harming nearby water bodies. These steps can help:

Fertilize

- Use phosphorus-free fertilizers – Most Michigan lawns only need nitrogen as they have enough phosphorus
- Apply once a year – Early fall is best
- Clean up fertilizer on sidewalks and driveways
- Don't fertilize before a heavy rain

Look for the Middle Number

- Fertilizer bags have N-P-K nutrient analysis
- The middle number (P) is the Phosphorus content
- A "0" indicates Phosphorus free

Soil Test

- It is helpful to know the soil on your property including the nutrient content, pH level and organic content to better understand what your lawn needs.

HOUSEHOLD ITEMS

Emmet County Recycling Drop-off Center

Address: 7363 Pleasantview Rd., Harbor Springs, MI

Phone: (231) 348-0640

Website: www.emmetcounty.org/recycling--111/

Recycling guide: www.emmetcounty.org/recyclingguide/

Items: Clothing, bedding, shoes and work boots. No insulated coats

Note: Clean and dry only. Please rubber band shoes and boots in pairs.

Goodwill Industries

Address: 1361 Pineview Dr., Gaylord, MI 49735

Phone: (989) 705-1747

Website: www.goodwillnmi.org

Items: Mattresses, springs and futons. Twin/single \$14 per piece; double/queen/king \$18 per piece.

MEDICATION/NEEDLE SHARPS

Emmet County

Address: See website or call for various drop-off sites

Phone: (231) 347-2500

Please visit this website for locations and disposal information:

www.emmetrecycling.org/what-can-i-do-with/paint/drugs

Items: Prescription drugs, controlled substances, over-the-counter medicines, pet medicines, nutritional supplements, medicated ointments/lotions, liquid medications (well sealed or in a plastic bag)

A Remedy for Residential Drug Disposal

Properly disposing of unused medications ensures safety and environmental health. In the past, flushing medications down the toilet was the accepted method of disposal. This method works for disposing of drugs in order to keep them from being misused but has negative consequences for our water systems. Wastewater treatment plants are able to screen out a large number of contaminants, but many medications are unable to be filtered out. This means many medications are ending up in our streams and aquatic ecosystems.

In 2000, the U.S. Geological Survey collected water samples from 139 streams in 30 states and identified both organic wastewater contaminants and pharmaceuticals in 80% of the sampled sites.

The topic of pharmaceuticals and personal care products (PPCPs) in our water has gained national attention and poses a threat to human and environmental health. PPCPs are a broad group of compounds consisting of human and veterinary medicine and consumer products such as fragrances, sunscreens, lotions, cosmetics and house cleaning products. Scientific studies have shown negative health implications for a number of aquatic organisms. The small dose of exposure for humans does not pose immediate concern for human health, but it is important to take steps now to prevent this

DON'T FLUSH

There are safer alternatives for disposing of medications!
See above and page 23 for local disposal options.

Otsego County Sheriff's Department, Drug Disposal Program

Address: 124 South Court Ave., Gaylord, MI 49735

Phone: (989) 732-7282

Note: Prescription medications and drugs can be dropped off at the Otsego County Sheriff's Department office at any time of day or night.

McLaren Northern Michigan—Gaylord Specialty Clinic

Address: 918 North Center Ave, Gaylord MI 49735

Phone: (800) 248-6766

Time & Date: 9 am—1 pm, 2nd Friday of even months of the year.

Note: Sharp drop-offs are for needles only and need to be in approved, hard, impermeable plastic container. For info, call ahead.

MERCURY

County of Otsego Household Hazardous Waste Disposal Day

For information on dates and accepted items see page 4 of this guide, check the county website or contact the Conservation District.

County website: www.OtsegoRecycling.org

Phone: (989) 732-4021 (Otsego Conservation District)

Emmet County Household Chemical Drop-Off Days

Address: 7363 Pleasantview Rd., Harbor Springs, MI

Phone: (231) 348-0640

Website: www.emmetrecycling.org

Details: No charge for Emmet County residents. \$1 per pound for out-of-county participants. Held 4 times a year. Call or check the website for information and to set up an appointment.

Preventing Hazardous Mercury Spills

Products containing mercury should be replaced with safer alternatives to avoid exposure and contamination. Mercury is used in many items such as thermometers, barometer, switches, thermostats and fluorescent lamps. These items often have mercury-free or lower-mercury alternatives.

Although it is legal to throw these items in the trash, it is highly recommended that you dispose of them at household hazardous waste collection sites. At high levels, mercury can cause damage to the nervous system and cause convulsions, tremors and inability to walk. Landfills have the ability to leach contaminants into groundwater, so reducing the amount of toxins we place in our waste stream can only help reduce the risk of contamination.

METAL

A & L Iron and Metal Company

Address: 2000 Milbocker Rd., Gaylord, MI 49735

Phone: (989) 732-5900

Website: www.alironandmetal.com

Note: Receive money for metal. Call for details.

County of Otsego Recycling Drop-off Program

Address: See page 2 or inside back cover of this guide for bin locations

County website: www.OtsegoRecycling.org

Phone: (989) 732-4021 (Otsego Conservation District)

Oil is a serious pollutant-- Recycle Used Motor Oil!

An estimated 11 million gallons of used oil are dumped per year in Michigan

When used motor oil is dumped down sewers, in empty lots, in holes in the ground, on weeds or in landfills the result is toxic. Used motor oil contains toxic substances (including lead) produced during engine use. Dumping oil contaminates ground and surface waters therefore impacting aquatic ecosystems and human health.

- One quart of oil will foul the taste of 250,000 gallons of water
- Oil kills small organisms floating on the water's surface. A lack of these organisms also causes those higher up on the food chain to be killed.
- One pint of oil can create an acre-sized slick on surface water.

MOTOR OIL Continued

Emmet County Recycling Drop-off Center

Address: 7363 Pleasantview Rd., Harbor Springs, MI

Phone: (231) 348-0640

Website: www.emmetcounty.org/recyclingguide

Item: Motor oil, hydraulic fluid, fuel oil, transmission fluid, lube oils, diesel fuel, oil filters. No gas or contaminated oil (Take these to Household Chemical Drop-off events)

Tractor Supply

Address: 1286 S. Otsego Avenue, Gaylord, MI 49735

Phone: (989) 705-1256

RADON TESTING

Health Department of Northwest Michigan

Gaylord Office: 95 Livingston Blvd., Gaylord, MI 49735

Phone: (989) 732-1794

SWAT Environmental Services: Radon Mitigation Systems

Phone: (989) 348-1111

Website: <http://radonmitigationmichigan.com/GaylordServices>

What is Radon?

Radon is a naturally occurring gas that is derived from radioactive decay of the element radium. It is colorless and odorless, which makes it impossible to detect without testing. When radium disintegrates in soils it emits radioactive gas that comes through to the surface. Outdoors radon is able to become diluted so it poses little health risk compared to inside a building. Radon can accumulate to high and dangerous levels.

How does radon enter your home?

Radon enters through gaps in suspended floors and around pipes, cracks in floors and walls, construction joints, cavities inside walls and the water supply.

How is radon a health risk?

Long term exposure to elevated radon levels increases risks of lung cancer. Radon is responsible for an estimated 21,000 lung cancer deaths per year

Radon is the second leading cause of lung cancer in the United States

To determine if radon exists in your home contact the local health department or other environmental services in your area for testing procedures.

SCRAP METAL

A & L Iron and Metal Company

Address: 2000 Milbocker Rd., Gaylord, MI 49735

Item: Motor oil, hydraulic fluid, fuel oil, transmission fluid, lube oils, diesel fuel. No gas or contaminated oil (Take these to Household Chemical Drop-off events)

YARD WASTE & COMPOST

City of Gaylord

Address: Gaylord DPW Yard, 102 E. 7th Street, Gaylord, MI 49735

Phone: (989) 732-5475

Items: Leaves, weeds, grass clippings and biodegradable bags

Note: City of Gaylord residents only. Material can be dropped off seven days a week in the spring, summer and fall. Composted material can also be picked up at no charge.

HOME COMPOSTING

What is Composting? Composting is nature's process of recycling decomposed organic materials into a rich, dark brown, crumbly soil known as compost. Anything that was once living will decompose. Basically, backyard composting is an acceleration of the same process nature uses. By composting your organic waste you are returning nutrients back into the soil.

10 Important Reasons To Compost:

1. Yard and food waste make up 30% of the waste stream. Composting helps divert that waste from landfills, waterways and water treatment facilities.
2. Significantly reduce pest problems and use of pesticides.
3. Healthy plants from healthy soil look better, produce better and have a much greater ability to fight off pests and diseases.
4. Adding organic materials to the soil improves moisture retention.
5. Adding decomposed organic material to soil feeds beneficial organisms.
6. Compost amends both sandy and clay soils.
7. Compost provides a balanced, slow-release source of nutrients that helps the soil hold nutrients long enough for plants to use them.
8. Composting saves money. Avoid the cost of buying soil conditioners etc.
9. Feeding your plants well will improve your own diet. Plants grown in depleted soils have a reduced nutrient content.
10. Composting is a valuable tool to educate kids about nature & lifecycles.
